# DropShipCo

## 1    Description

This project is based on the drop shipping concept in which a platform is developed intended to promote the business. This project is to create a platform in which customers are able to buy the available products that is put on sale by the sellers.

## 2    Scope

This project is for a single seller for now. This means there is only 1 seller which acts as the admin as well. The scope may be broader to accommodate more sellers in the future. However, anyone is able to visit and buy the products being promoted if they comply to the requirements stated in the later section.

## 3    Developing Platforms

The project is developed on 3 platforms which are stated below. These platforms must both correspond accordingly and display the same information without any conflictions.

- ➢ Website
- ➢ Android Application
